

2025 Food Donation Cold Storage Equipment Guide

The Surplus Food Donation Equipment grants provide funding to strengthen the capacity of non-profit organizations to safely recover and redistribute edible surplus food generated in Alameda County, increasing the volume of food available to help nourish communities in Alameda County. These grants support the acquisition of essential equipment, to improve efficiency and build capacity for the edible food recovery components of SB 1383.

Starting January 6, 2025, apply to strengthen your food recovery efforts! Eligible food storage equipment includes insulated totes, thermal blankets, refrigerators, freezers, pallet jacks, shelving, scales, and cooking and serving equipment. Grant applications are reviewed through a competitive grant solicitation process considering the amount of surplus edible food being rescued, type of food, organizational need, and readiness to implement, and overall community impact.

PG&E provides incentives on qualified products, as detailed below.

PG&E Qualifying Product List

- Products listed in the spreadsheet linked below, have been tested for durability, reliability, and energy efficiency.
- All products are “built-in” or packaged, meaning that everything is self-contained in the unit.
- Non-packaged systems are not eligible.

Selecting The Right Equipment

- If you have a certain product in mind, check that it is listed in the Qualifying Product List. In the spreadsheet, select the correct product category from the tabs below – “Glass-Door Refrig”, “Solid-Door Refrig”, and “Solid-Door Freezer”.
- When considering different products from the [Qualifying Product List](#), your most important considerations are:
 1. **Dimensions:**
 - Will the equipment fit in your space?
 2. **Electrical Outlet Requirements:**
 - (110-120V or 220-240V)
 - Can your outlet handle the equipment?
- Determine product dimensions and electrical requirements by entering the product make and model into a search engine. Dimensions will be available on the product manufacturer or distributor’s product page or provided with a link to a PDF specification (spec) sheet – see examples in table below.

Specification Sheet Examples

1. [Single Door Refrigerator Spec Sheet](#)
2. [Double Door Refrigerator Spec Sheet](#)
3. [Commercial Solid Door Freezer Spec Sheet](#)

PG&E Rebate Process

- **Rebates are administered by PG&E and completely separate from your StopWaste grant.**
- Rebates range from \$30 to \$350 per unit and are listed in the PG&E Business Rebate Catalog PDF linked [here](#).
- Find rebate amount specific to your product by refrigeration product category: Commercial Glass Door Refrigerators, Commercial Solid Door Refrigerators or Commercial Solid Door Freezer.
- Match your product’s internal storage capacity (volume in cubic feet), per example table below.

Comm. Solid Door Refrigerator Rebate Table

Rebate Code	Description	Rebate/Unit Measure
F183	Commercial Solid Door Refrigerator Internal volume less than 15 ft ³	\$45/unit
F184	Commercial Solid Door Refrigerator Internal volume 15 ft ³ –29.9 ft ³	\$60/unit
F185	Commercial Solid Door Refrigerator Internal volume 30 ft ³ –49.9 ft ³	\$85/unit
F186	Commercial Solid Door Refrigerator Internal volume 50 ft ³ or greater	\$120/unit

- The process is quick and easy:
 1. Buy equipment on the [Qualifying Products List](#).
 2. Have your receipt or invoice in a digital format, including make and model info, along with Service Account ID (SAID) from your PG&E bill (different than your account number).
 3. You will need the measure or rebate code associated with your specific product, available in the Qualifying Product List.
 4. Go to the website [listed here](#) and complete the online application.

Eligibility – Installation address must have a commercial electric account with PG&E, residential accounts are not eligible.
